

The UK Liver Pathology Group (UKLPG) was formed in 2016, evolving from the UK Liver EQA Scheme and the Liver subcommittee of the Pathology Section of the BSG, with the purpose of promoting **excellence in liver histopathology services** in the UK and Ireland, across all levels of specialisation, **through professional collaboration in education, quality assurance and research.**

The **Research subcommittee** aims to act as a source of histopathological advice for clinicians and scientists undertaking clinical, translational or pre-clinical research (including animal modelling), particularly those lacking local pathological support and resources.

**The subcommittee welcome enquiries by email to [UKLPG.Research@gmail.com](mailto:UKLPG.Research@gmail.com).**

#### **UKLPG Research subcommittee**

Dr Dina Tiniakos (Chair), Newcastle University

Prof Rob Goldin, Imperial College London

Dr Tu Vinh Luong, Royal Free London

Dr Tim Kendall, University of Edinburgh

Dr Ben Challoner, Guy's and St Thomas' NHS Foundation Trust
